YOUR GUIDE
TO TECHNOLOGY AT CLIFTONS

cliftons venues

With Cliftons technology, you can be agile in how you deliver events. Whether it's virtual classrooms for training, video conferencing, live streaming, complex AV setups, computer rooms or secure remote network configurations you need, you're completely covered at Cliftons.

In times of group meeting and travel restrictions, event technology can be the difference between a complete freeze on your plans… or maintaining continuity!

Virtual and hybrid events (broadcasting to remote attendees) simply requires a slightly different organisational approach – and that's where our technical gurus come in! When you book an event with us, they are available to support you with planning and setup at every step of the way.

Read on to discover all the technology and support options available to make your meetings and events remarkable.
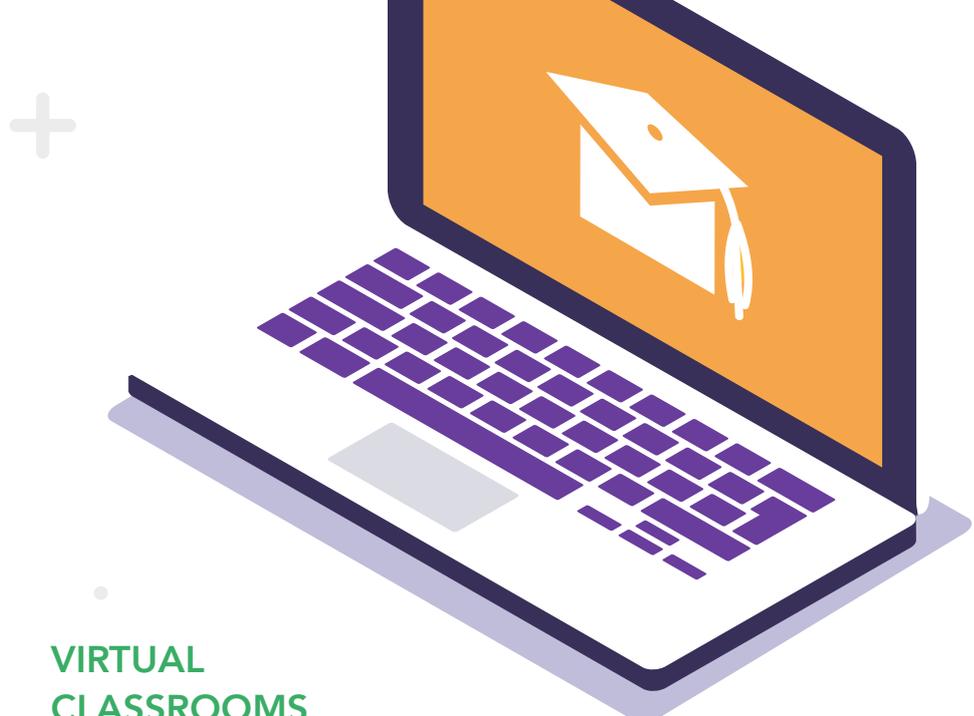

VIDEO CONFERENCING

Connect with associates far and wide with Cliftons high-definition video conferencing systems.

Why you'll love it

- Links up to 100 participants
- Mobile friendly
- Recordable
- Easy to share documents, presentations or your screen
- + Much more!

Video meetings are offered via Zoom and Webex, however if you prefer another platform (such as Microsoft Teams or GoToMeeting) that's no problem. We support most third-party platforms. The equipment is configured at the front or back of the room according to your preference.

WEBINARS

A webinar is a meeting, lecture, workshop or presentation held online. Versatile and functional, they can be streamed live or recorded for later distribution. Hosting one is easy when Cliftons handle the logistics for you.

Why you'll love it

- Online presentations or meetings for up to 1000 participants

- Host controlled, allowing you one-way communication

- Mute participants on entry

- Share documents, presentations, or the host's screen

- Participants can ask questions and interact instantly via the chat feature

- Recordable for sharing

Cliftons manage the technical setup and assist with customised online attendee registration and participation reports.

VIRTUAL CLASSROOMS AND SEMINARS

Why fly your instructor city to city when they can be in multiple places at once? Virtual Rooms involve cameras positioned in your room to allow instructors to present to local and remote attendees simultaneously.

Why you'll love it

- Connect up to 25 sites per session

- Remote attendees can see the instructor, whiteboard and fellow attendees via video linked screens (and vice versa)

- Configuration is customisable to your needs

- Choose from classroom or seminar room layout

This is a more comprehensive solution than a typical video conference. It's designed specifically to integrate your remote participants into a session (with minimal disruption to the event).

LIVE STREAMING

Live streaming is the broadcasting of live video to an audience over the web. Live streaming usually combines live (in person) and virtual (remote) participants, making this solution perfect for executive events, corporate meetings, town halls, training and education.

Our spaces and technology are designed to create the ideal solution for your company's requirements.

TELECONFERENCE

Need to arrange an audio-only conference call? We set this up using a central desk phone equipped with a loudspeaker and microphone. You can also opt for our larger model phone systems that include wireless extension microphones, ideal in large spaces where attendees are spread out (such as 20 persons in U-Shape). Our team provides an audio bridge via Zoom so that multiple external parties can dial into the audio meeting.

Why it's ideal

- Suitable for small to large meetings

- Includes phone system with loudspeaker and microphone/s

- Multiple external parties can join your call

- Recordable

Link in your other locations with multi-site network connections

Cliftons can arrange multi-room network connections across

Cliftons venues in different locations. If you would like to include additional cities such as Melbourne and Singapore in your event for example, that's no problem. Company events occurring across two or more locations simultaneously can be seamlessly linked.

OTHER CONSIDERATIONS

Bring your own device

All rooms are Bring Your Own Device (BYOD) ready. Enjoy a fast Wi-Fi connection and plenty of dual power USB cubes to plug into. Technical support staff are always on hand to ensure your session is hiccup-free.

Network Security

All Cliftons venues are supported by high level logical and physical network security measures to help keep your data secure. Core infrastructure logically separates individual rooms

for security, but also allows for multi-room connections if required. That's both within a venue and across our venues located in different cities.

Secure Connections to your own network

Whatever connection option you use to connect remotely to your own network, Cliftons IT team are flexible and can work with you to support your desired setup.

Super-fast internet

How would you run a successful meeting without it? The venue features two separate networks to ensure fast internet service continues in the event of a network failure. An instructor

ethernet cable and solid Wi-Fi connection is provided in rooms, along with free guest Wi-Fi in breakout areas.

Conferencing Platform Agnostic

The conferencing equipment used at Cliftons is compatible with a variety of platforms such as Skype, Microsoft Teams, Blue Jeans, Zoom and WebEx. Please let us know if your organisation uses a specific software suite for internal conferencing. We can work to ensure your technical requirements are met and expectations exceeded.

ADDITIONAL IT EQUIPMENT AND SERVICES

To make your event remarkable, take advantage of our support products beyond our standard offerings:

- Digital video camera and tripod to record your conference

- PA System with lapel or handheld microphone/s

- Customised PA systems

- Technical support for affiliate events

- After-hours technical support

- Servers

- Network switches

- IP phones

- Wireless routers

- Video and audio recording services

- Electronic whiteboards

- And more...
